BLD25-2995	Issued	Building Permit No Plan Check	5/23/2025	05/27/2025	18080 Myrtle Ave Agua Caliente [AGU]	I am applying for a no plan check construction permit in order to make repairs to the upper lateral of my sewer line. I have already applied for a sewer permit which relates to the repairs downstream of the sewer cleanout. I have been informed that I also need to apply for a construction permit for the repairs upstream of the sewer cleanout going into my home. In essence I am replacing the majority of the upper lateral of the sewer for my home. The upstairs bathroom was modernized by a previous owner with ABS lines that tie into a cast iron stack. That cast iron stack, and everything downstream of it up to the cleanout will be replaced (that is the section relevant to this construction permit, the section from the cleanout to where the repairs will be tied into the old cast iron relates to the sewer permit). This will involve removing the concrete pavers using a concrete saw, and then digging down by hand approximately a foot to reach the old cast iron, removing it. adding a bed of gravel, and then installing the new schedule 40 ABS piping& fittings. There are three main drainage points which are shown on the engineering drawing, a drain for the downstairs toilet, the main stack, and a drain for the upstairs kitchen sink/downstairs laundry room sink. I will schedule an inspection before starting work, to show an inspector the current sewer line layout and discuss my proposed fixes to ensure it will all meet local codes before starting any work. There is a PGE gas line near the sewer line, so I will call them first to identify where the line is to ensure it doesn't get disturbed during the work.	056-392-016	\$363.62	\$0.00	05/01/2025 - 05/31/2025

BLD25-2523	Awaiting Applicant Response	Building Permit With Plan Check	5/4/2025		4422 Roblar Rd Sebastopol [SEB]	Proposing the necessary permits to complete siding, window, and door replacement on my house & garage (siding permit has already been approved for the house and garage: BLD25-2240). I will be doing all the work myself. The siding and trim will be changing from cedar to improved fiber cement board. The house originally completed construction in 1985. The old aluminum windows will be upgraded to Milgard V400 Title 24 windows. All doors and window glass meet or exceed Title 24. Metal doors are being upgraded to fiberglass doors with improved insulation properties. The current shearing and sheathing of the house and garage will be upgraded to the ZIP System 1/2" OSB with an approved and premanufactured Water-Resistive Barrier that meets all CRC and IBC requirements for Vapor and water movement. The ZIP System meets requirements for PS-2 Structure 1 shearing. The house main entrance will have a larger door installed requiring a framing permit to increase the size of the header. The two garage second story doors will be replacing current windows. The window sills will be removed but no other framing changes are necessary. The current header will be used for both the front entry door and the back French door. Currently there are construction stairs inside the garage that will be replaced with an outside staircase-deck on both the west and east side of the garage. The plan is to build both decks free standing (no ledger board to the garage). I would like to defer obtaining permits for the decks as I need to complete siding, trim, windows, and doors so that I can complete scheduled termite fumigation on the house and garage.	024-031-042	\$0.00	\$0.00	05/01/2025 - 05/31/2025
