BLD26-0164	Awaiting Applicant Response	Building Permit With Plan Check	1/13/2026		8880 Poplar Ave Cotati [COT]	Purpose: Fire safety and code compliance upgrades per plan review comments 1. Fire-Rated Sheetrock Installation Install Type X 5/8" fire-rated sheetrock around the exterior walls of the bedroom and end of hallway adjacent to the non-living area. Tape, mud, and finish all joints to meet 1-hour fire separation rating requirements. 2. Fire-Safe Doors Install fire-rated doors(2 total) (minimum 20-minute rated) at both hallway entrances leading to the non-living area. Doors to be self-closing and self-latching per fire code specifications. 3. Ceiling Insulation and Finish Insulate the ceiling of all conditioned living spaces to a minimum R-28 insulation value or greater. Apply 5/8" Type X sheetrock to ceiling, tape, mud, and finish to code. 4. Foundation Plan (As Proposed) Add foundation plan to reflect proposed structural improvements and ensure compliance with building department requirements based on previous conversations. 5. Entry Deck Modification Modify entry deck design to convert to stairs as shown in the revised plans. Ensure stair construction meets code for rise/run, handrail, and guardrail requirements.	046-222-035	\$0.00	\$0.00	01/01/2026 - 01/31/2026

GRD26-0007	Ready for Plan Check	Grading Permit	1/9/2026		5425 Briggs Ranch Rd Geyserville [GEY]	The existing 96" rusty and collapsing culvert, surrounding fill and concrete abutment, and 50-foot-long railcar are proposed to be replaced with a 70-foot-long railcar paired with drilled piers and concrete abutments. The streambanks will be graded and stabilized with riprap, willow-planted riprap and a boulder cluster as well as, erosion control fabric. Surfacing will include asphalt concrete (AC) paving along the new railcar and immediate approaches. New impervious areas (bridge and asphalt) include 1,644 square feet within the project area. The estimated limits of disturbance include 6,769 sf or 0.16 acres. The grading summary includes an estimated 175.4 cubic yards of cut volume and 54.6 cubic yards of fill volume, resulting in a net cut volume (spoils) of 120.8 cubic yards. All spoils will be removed from the riparian area and permanently stored at a designated location on the project parcel.	132-170-022	\$3452.30	\$0.00	01/01/2026 - 01/31/2026

WEL26-0003	Resubmittal Requested	Well Permit	1/16/2026		3295 Adobe Rd Petaluma [PET]	Two soil borings will be drilled using a truck mounted drill rig equipped with 8-inch-diameter hollow-stem augers, with anticipated maximum depths of 30 feet below the surface depending on the conditions encountered. Borings will take place outside of the existing structure. Prior to subsurface work taking place, work areas will receive utility clearance from Underground Service Alert (USA) as well as a private utility locator. Upon completion of drilling and sampling, the borings will be abandoned with neat cement grout per county requirements and capped to match existing conditions. Excess soil cuttings will be collected and taken back to the Geocon Lab for disposal by Geocon representative on-site. Borings to be drilled by licensed C-57 driller. The work is set to take place to evaluate existing subsurface soil and geologic conditions prior to potential improvements taking place.	017-130-002	\$628.48	\$0.00	01/01/2026 - 01/31/2026
